

CRISTIAN GRIEBLER

Skills

- Python (Pandas, NumPy, Seaborn and Matplotlib)
- TensorFlow, Scikit-learn, Keras and Pytorch
- SQL (SQL Server, MySQL, PostgreSQL)
- Microsoft Power BI (VBA/Excel, DAX)
- Tableau, Streamlit and Plotly
- GCP (Dataflow, BigQuery and Looker Studio)
- SCRUM, Agile Methodology, Kanban
- AWS (S3, Sagemaker, DataBricks)
- Machine Learning (SVM, XGBoost, NLP)
- Streamlit, Tableau and Dash
- Microsoft Azure, PySpark, Hadoop
- Github, GitLab and Docker

Projects

DATA ENGINEERING PROJECTS

Built [deep-learning segmentation](#) pipelines (UNet) achieving >0.83 Dice accuracy and significant processing efficiency

Deployed scalable dosimetry data pipelines (GATE/Geant4) for 3D voxel dose mapping and reproducible simulations

Engineered ETL pipelines in Databricks using PySpark, Delta Lake, and GCP services (BigQuery and Cloud Composer)

Deployed predictive model in GCP using Docker and GKE for scalable, containerized inference

SOFTWARE DEVELOPMENT AND DATA ENGINEERING – Well be Health Tech – Curitiba, PR (Brazil) 2023

Predictive and classification models for data analysis in the company database (AWS, Pyspark and Databricks)

Performed statistical analysis to identify which data engineering tool is the best option for each health insurance company

Loaded and visualized data with Python and SQL to identify key business intelligence that improved client satisfaction by 60%

DATA ENGINEERING AND DATA SCIENCE– @TECH – SAO PAULO, BRAZIL 2024

Development and analysis of Optimization models and predictive model for analysis of production (Machine Learning)

Ensure data quality and governance by managing and developing data models and schemas (GCP, Looker Studio)

Implemented a new automated report using Python, which reduced processing time by 50%

Work Experience

DATA ENGINEER – @TECH – Sao Paulo, Brazil Dec 2023 - Current

Automated and optimized ETL workflows using Python, SQL, integrating data ingestion, transformation, and loading into BigQuery

Developed and deployed machine learning models for profit optimization using GCP services (BigQuery, Vertex AI, Cloud Functions)

DATA ENGINEER – Well be Health Tech – Curitiba, Brazil Dec 2022 - Dec 2023

Utilized SQL and Python to incorporate more than 2,000 lives into the company's Business Intelligence platform (Python, AWS)

Handled ETL processes for various file formats (PDF, TXT, Word, PPT) to identify relationships and upload them (Databricks)

DATA SCIENTIST/SOFTWARE DEVELOPER – Penguin Technologies – New Jersey, USA Out 2021 - Dec 2022

Developed dashboards with Power BI to assist clients in business performance analysis

Processed and transformed client data using DAX, Excel, Python, and SQL to ensure completeness and validity

PRODUCT OWNER/SCRUM MASTER – SENAI – Londrina, Brazil Sep 2020 – Sep 2021

Worked in Business Intelligence managing data science projects that aligned with business strategies

Experience with Scikit-learn, Keras and TensorFlow libraries to create, train, and evaluate machine learning models to data prediction and classification

Education

DOCTORATE IN PHYSICS – Instituto de Radioproteção e Dosimetria – Rio de Janeiro, Brazil Feb 2024

Majors: Machine Learning, Data Engineering, Computer Engineering, Nuclear Physics, Medical Physics, Statistics

MASTER OF SCIENCE IN BIOMEDICAL ENGINEERING– Universidade Tech. Federal do Paraná – Curitiba, Brazil June 2018

Majors: Biomedical Engineering, Medical Physics, Physics, Nuclear Physics, Biostatistics

BACHELOR OF SCIENCE IN PHYSICS – Universidade Estadual de Londrina – Londrina, Brazil Dec 2016

Majors: Physics, Mathematics, Statistics, Nuclear Physics
